DETAILED ACTION

1. Claims I, 4, 6-7, I0, 12-14, 16, 18-19, 21, 23, 26, 28-30, and 32 are amended.

Claims 5, 11, 15, 17, 20, 22, 27, 31, and 33 are herein canceled

New claims 34-42 are presented herein.

Claims 1-4, 6-I0, 12-14, 16, 18-19, 21, 23-26, 28-30, 32, and 34-42

have been examined and are pending.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.1 14, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.1 14, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.1 14. Applicant's submission filed on 01/16/2007 has been entered.

Response to Amendment

3. Applicant's amendment filed 01/16/2007 necessitated the new ground(s) of rejection presented in this Office action. Applicant's arguments with respect to claims 1-3, 7-9, 13, 18, 23-25 and 29 have been fully considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2131

4. Claim 1-4, 6-10, 12-14, 16, 18-19, 21, 23-26, 28-30, 32, and 34-42 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1, 7, 13, 18, 23, 29, 34 and 39 recite the limitation “ the first portion of the shared secret” be disqualified from use with symmetric key cryptography between the user terminal and the access point. However, the claims also require “scrambling” a user certificate using “the first portion of the shared secret” known only by the user terminal and an access point of the wireless network. The Examiner asserts that scrambling (or encrypting) the user terminal certificate using the portion of the shared secret in of itself would mean that a portion of the shared secret has already been used in a symmetric key cryptography between the terminal and the access point. Therefore, disqualifying the portion of the shared secret from use in symmetric key cryptography render the claims vague and indefinite, because the access point would not possess a qualifying shared secret to recover the scrambled user terminal certificate.

Dependent claims 2-4, 6, 8-10, 12, 14, 16, 19, 21, 24-26, 28, 30, 32, and 35-38, 40-42 are also rejected by virtue of their dependencies.
